## About This Game

**1971 : Indian Naval Front** is a Naval Combat game made as a tribute to the Indian Navy towards their contribution during the 1971 India-Pakistan War.

*1971 was a year filled with diplomatic tensions between India and her neighbour Pakistan. As the atrocities by the Armed Forces from West Pakistan against the people of East Pakistan kept increasing, **Indira Gandhi**, the then **Prime Minister of India** decided to act on it and determined to liberate **East Pakistan(Bangladesh)** as an independent country. During the months of **October and November** in 1971, Indian Navy sent her famed aircraft carrier **INS Vikrant** and few more powerful vessels to create a blockade against the naval vessels of **West Pakistan** and her **allies** in the **Bay of Bengal** to the East. Pakistan Air Force, on 3rd December, attacked multiple Indian airfields along the North and North West regions of India.*

***The War had now officially begun!***

*In retaliation, the Indian Navy sent 3 of her **Osa-I class missile boats** in an operation codenamed **Operation Trident** with an objective to destroy the **Karachi Harbour**. **Operation Trident** was a resounding success! After this point, major naval operations were kicked off in both the **Eastern and Western waters**; an encounter with the Pakistan Navy's **Submarine PNS Ghazi** being one of them. Indian Navy's fighter jets like the **Hawker Seahawk** were also used to destroy many East Pakistani Airfields and Harbours like **Chittagong** and **Cox Bazaar**.*

*On 16th December, Pakistan eventually signed the **Instrument of Surrender** and **Bangladesh was declared an independent country**.*
