Like Quest for Glory with a focus on magic, Very Good.

(maybe re-make the cut-scenes at some point). Just finished streaming this one. Very atmospheric and instills the right sense of dread and helplessness. The music and sound work is terrific.

It REALLY needs a faster text skip feature, though.. Wait wasn't this on flash games for free?. Furious angels is agrav shooting meets devil daggers, it's simplistic, it's brutal, aaaannndddd it's overly compelling, this is one of the few games I've genuinely had to force myself to quit.. It's worth buying the game just for this.. YAAAASSS!!! A YURITOPIA THAT WILL GIVE YOU CUTE FUZZY FEELS!!!

As my introduction into the VN realm, Kindred Spirits on the Roof's "calendar" format wasn't that hard to jump into. Or... at least I didn't think it was. The pacing could be seen as a little chopping, considering that you often jump back a few days when subplots are opened.

Otherwise, I think that this is a really cute, fluffy wlv game. I bought it on sale, so the 40+ hours or whatever I've spent on it (not counting the extra scenes that were opened when I finished the game because I haven't gotten to those yet), is totally worth it. Some of the couples weren't really my cup of tea\thought were dull, so I pretty much skimmed over the dialogue of their scenes. But overall, the story plot was decent.

Totes recommend this game. If anything, to support the Yuri game genre. We needs more lady-love in the saturated male-centric game world.. This videogame makes me angry-happy, arcade hardcore and fast paced gameplay about cupcakes. Kind of good n' old endurance arcade game.

Remember Ren and Stimpy? A lot of humor in the art style inspired in this iconic 90's dark comedy cartoon.

Cupcakes against ungly flies, makes sense to me, I don't like flies either.. Although I have had this game many years. I have only played 59mins. Still to this day I have not driven a bus in the game. The 59mins were trying to fix my controls and walk to the bus. I did not pay to do a bushtucker trial everytime i wish to drive a bus.

10/10 Bus game, walk next time.. 8.5/10 - Very simple experience with an incredible story. Makes fantastic use of the medium—VR.

Great little game! Not long but what is there is fun, and it'll run on pretty much anything..... godawful game. First of all, thank you HappyHand for working hard to bring us this game despite all the trouble steam caused  
Now, let's talk about this game.

The story and ost are generic, just like most games of its kind, but i think i can give it a pass since that's not the reason i came to this game.

The gameplay is weak, awful balance, upgrade your weapon require rare items drop from monsters, you may find yourself wasting time farming it only to find out that the weapon you just upgraded still have less stat than your next weapon you can find in the shop. The game has a built in cheat to let you earn money using the♥♥♥♥slapped guy, the item is limited and also unimportant since you can complete the game without ever touch it. The only challenge i can think of is some late game bosses, but it can be easily deal with high dex + paralyzed accessory to make a stun lock. The dev seems like he want to make the game as easy as possible, so that people can focus more on the hscene.

The art is where the game truly shine, the characters all have a unique pixel model, some unique asset for furniture that look so different from you typical rpgmaker game, beautiful UI. And the most beautiful thing in this game it its hscene, that artwork is outstanding, hashtag #needmoreahogao, combined with talented voice actresses make the scenes so wild that you can't resist. That alone make the game worth buying.

I give it 3/5. This game is absolutely fantastic. After a while of searching for a multiplayer, fast-paced action game for a great price I came to this gem. The gameplay is fast but responsive and skillful, there isn't a moment where you feel cheated by the controls. There's not a flaw in this game and you could easily kill hours playing this. Would recommend.

It's also a perfect price to gift a friend after you learn the skills then kick their butt.. until they get better than you xD. I find this game kind of charmingly bad, but it's still bad.

Survival horror classic tank control roguelike with:

- More awkward tank controls than even genre-norm
- Absolutely no sound effects for enemies thus partially missing the point of RE's fixed camera angles
- Pretty shoddy balancing
- Fairly unnuanced combat
- You can get screwed pretty fast by just encountering the wrong enemies too early
- Doesn't have a lot of content or variety
- Game doesn't explain its own mechanics well

However, you can knife everything to death like you're a character in Fist Of The North Star if you get rolling enough to level up and the writing is like, adorably typo-riddled.

I find it kind of charming in its neverending naffness, but I don't think this is a game for most people.. Come for fun, stay for pudding. Hilarious and fun, though kind of short. Also a ton of reference from 100% Orange Juice can be found here, which is great because I love both game's stories.

...but just who the hell is Kyupita?
